

SFD21\_Intel

Kristie Mann, Sr. Director Products, Intel Optane Group

“From idea to reality”

Strong uptake of PMem in HPC was unexpected

Learnings

Software really matters

Adoption in IaaS - not so much due to some uneven performance

OEM qualifications have been slow

Status quo thinking makes it hard to understand this isn't just memory or storage

Intel definitely not killing consumer Optane line

Cerner customer story

Optane for caching customer diagnostic images at the edge

Moved from SAN to vSAN already
